ABOUT ME

Technician in Programming and Full Stack Developer with strong communication skills in teamwork environments, adaptability, and flexibility. Disciplined, proactive, and results-oriented, eager to learn and face new challenges. I aim to contribute to projects that foster my technical and professional development.

EXPERIENCE

Co-founder & Full Stack Developer

Madryn Empleos | 2024 - 2025

Co-founder and Full Stack Developer at Madryn Empleos, a digital platform connecting employers and job seekers.

- Developed the frontend using NextJS and React.
- Implemented the backend using Spring Boot and PostgreSQL.
- Created automation processes using Artificial Intelligence models with Python.
- Led decisions regarding the platform's design, functionality, and architecture.

Full Stack Developer

Madryn Buceo | 2025

Freelance Full Stack Developer at Madryn Buceo.

- Developed the corporate website using NextJS, React, and TailwindCSS.
- Implemented a management and booking system with a Spring Boot backend.
- Applied agile methodologies (Scrum) for planning and project development.

HIGHLIGHTED ACADEMIC PROJECTS

Backend Applications

- University Management System: Developed a system applying Object-Oriented Programming (OOP) principles, data structures, and RESTful API development.
- RRPg Card Game in Java: Created a turn-based role-playing game using design patterns and advanced event management.
- ConsumifyAPI: Developed a REST API using ExpressJS to consume and manage data from the Spotify API.

Frontend Applications

- ConsumifyAPI Mobile: Built a mobile Spotify clone using Flutter, integrating and consuming my own REST API.
- Movie Page: Developed a web application using Flask that consumes data from the IMDB API to display updated movie information.

EDUCATION
